Food waste management and bioeconomy

Life cycle assessment and carbon footprint

Logistics, policies, regulatory constraints and markets in waste management

Management of waste streams (CDW, WEEE, RDF, ASR, etc.)

Plastic waste impacts, management strategies and solutions

Recycling of wastes and resources recovery

Smart technologies and digital tools in waste management

Waste-to-energy technologies

Waste treatment and valorization technologies

Wastes as critical raw materials resources

Wastes refineries

september 6-8 | 2023 University of Coimbra

www.wastes2023.org

ORGANIZED BY:

Wastes aims at bringing together academia and industry experts from the Waste Management and Recycling sectors, from around the world, offering state of the art knowledge and sharing experiences with all in attendance.

PUBLICATIONS

Authors are invited to submit their contribution as full or short papers.

All full papers accepted will be included in a book published by CRC Press – Taylor & Francis Group, that will be indexed in Scopus and Web of Science – ISI.

Also, the short papers accepted will be integrated in the Book of Proceedings of the Conference (with ISSN).

LANGUAGE

English is the official language of the Conference.
